

Thanks for purchasing! This document contains a how-to guide and general information to help you get the most out of this product. Look here first for answers and to get started.

Amaplug

This plugin displays bestseller lists and single products on your WordPress posts and pages. You can search (and show) products with specific category, browse node id or a simple keyword. Amaplug is using the Amazon Product API.

If you have any questions, feedback or suggestions regarding this product be sure to read the *Help, Support & Feedback* section. Thank you for purchasing this product and I hope you find it useful for your projects.

Regards Kai

Plugin requirements

Before installing the plugin, please check that the following conditions are met on your server:

- PHP 5.4 or greater
- MySQL 5.0.3 or greater
- WordPress 3.4 or greater (tested up to 4.1.1)
- PHP curl and/or PHP fopenenabled

If you are already running a working WordPress installation you can easily install the plugin.
